

Graco Literider Classic Connect Front Wheel Replacement

This guide will show you how to remove the front wheels.

Written By: Tyler Laird

INTRODUCTION

This guide will help you replace the front wheels. A small metal tool is required to remove the wheels. A key or screwdriver will work.

Step 1 — Front Wheel

- Flip the stroller over so that the wheels are facing upward.

Step 2

- Pull the sleeve covering the base of the wheel back from the wheels to expose the small metal button.

Step 3

- Use a key or other thin object to push down the button holding the wheel in place.

Step 4

- Pull the wheel off the frame.

To reassemble your device, follow these instructions in reverse order.
